(408)-510-4173

Exceedingly marketable front end developer coupling skills from previous work in graphic design with newfound passion and strong skill set for coding. Recent graduate of a 14 week immersive coding bootcamp teaching three full stacks: Python, Rails, and MEAN. Eager to join a collaborative team that conquers and distributes life-enriching projects.

SKILLS

Languages
JavaScript   Ruby
HTML 5   Python
CSS

Libraries / Frameworks
jQuery   Express.js
AngularJS
Rails

Servers / Database
Node.js   NoSQL
MongoDB
MySQL

Dev Tools
Adobe Illustrator
Adobe PhotoShop
Terminal
Sublime Text

EMPLOYMENT

Kimmel Athletic
January 2006 - October 2015
Seattle, WA
Decreased customer wait time by over 80%. Increased efficiency through developing logos and promotional items for print and online. Collaborated with sales team and clients to ensure artwork and final products met provided specifications.

EDUCATION

Coding Dojo Apr 2016
San Jose, Silicon Valley
Achieved Black Belt (Highest earning of Achievement)
Achieved Green Belt (Project Best-In-Show Achievement)

De Anza College Dec 2015
Cupertino, CA
9 credits of C++
4 credits of Java

Art Institute of Seattle June 2002
Seattle, WA
Associate Degree in Computer Animation and Design

PROJECTS

HashWarriors
Solely built aand designed a website that allows users to dictate a fight between two characters. A score is kept by the number of Twitter hashtags posted in favor of the winning character. Additionally, illustrated and animated the fighters.

No Worries
Solely built a web app that allows users to set a timer on when they are expected to complete their event and set a emergency contact. If the user does not check in with the app within their expected completion time, the contact is alerted via text and email which contains the user's initial geographical location. Conceptually designed the entire site's aesthetic and overall appearance.

Coding Nom Nom
A website that provides straight to the point code so programmers can continue with their project. As an added bonus, users are challenged to post short concise instructions which enforces their knowledge of that topic.
